

SCA Pharma's Commitment To Quality

**At SCA Pharma, Quality is at the
Forefront of Everything We Do**

We are always striving to meet or exceed your expectations to ensure you can provide patient care. SCA Pharma sets the bar when it comes to quality, service, and product offerings. We are always searching for opportunities to streamline systems, improve products, and innovate to better serve our customers.

Redefining Quality Standards

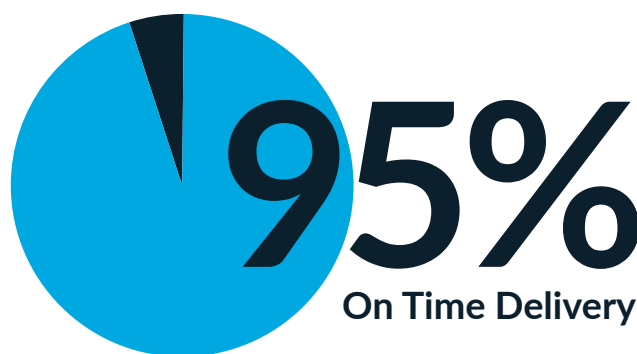

Our goal is to set the bar across the industry for quality standards at 503B compounding facilities. We take a meticulous approach to everything we do and are proud to be a reliable source of high-quality sterile admixtures. Not only do we meet cGMP regulations defined for 503B Outsourcing Facilities, we continue to fine-tune our quality processes and protocols to deliver safe, life-saving medications to those who need them most.

As a 503B supplier, SCA Pharma undergoes numerous inspections from state and federal officials, independent third party experts and health systems throughout the United States. SCA continues to elevate the definition of safety and quality in the 503B industry.

On Time Delivery

At SCA Pharma, we understand the importance of getting the critical medications you need, when you need them to keep your pharmacy running smoothly. We are constantly working to streamline our shipping process so you can focus on what is most important, patient care.

SCA Pharma is committed to reaching our goal of 95% + on time shipping.

What We're Doing Differently

Increasing production levels to better anticipate the growing needs of our customers.

Securing additional raw materials to ensure our ability to supply the market with the ready-to-use medications.

Expanding IT security levels to defend against external threats.

Order Your Way With Flexible Shipping Options

Buy and Ship Now
